Ida Hvidsten has more than 15 years of experience in planning and project management for Grindaker as Landscape Architects.

Ida has experience from many different project types such as parks, urban spaces, urban development, public transportation, development, streets, schools, commercial buildings and residential areas. The varied nature of the assignments has provided experience in various project phases from idea and concept development, area and detail planning and construction follow-up.

Ida has experience as subject manager and project manager in several projects. Ida is particularly skilled and engaged in the environmental aspects of the projects, such as urban ecology and blue-green structures and green mobility, always with the aim of creating good places for users.

Ida Hvidsten has very good knowledge of digital aids such as AutoCAD and Adobe programs.
